

FOLIO

Chancellorship Undertaken by Peter Savaryn

On 6 July 1982, Peter Savaryn, Q.C., was installed as the twelfth Chancellor of The University of Alberta. In the presence of a platform party that swelled the stage of Convocation Hall, representatives of the University's constituent groups, members of the Legislative Assembly of Alberta, personages from other post-secondary institutions, and family and friends, Mr. Savaryn was sworn in by the Honourable Frank Lynch-Staunton, Lieutenant Governor of Alberta. The Chancellor then delivered the following inaugural address.

My first duty is to thank my nominators, the members of the search committee, and the members of the Senate for electing me. In doing so, you have bestowed upon me a great honor, for the position of Chancellor has been filled by ten illustrious men and one especially talented lady. I wish to thank also all who sent me messages of congratulations and best wishes. Most of all, however, I wish to thank the members of my family, and especially my wife Olya, without whose love, support, and encouragement I would not be here today. I lack words to express how much I owe to her.

My second duty is to explain why I aspired to become Chancellor. There are two main reasons. The first is that, like Maimonides, I really do believe that "the advancement of learning is the highest commandment." I shall return to this point later. The second reason is more personal. The University of Alberta is my alma

mater. It did so much for me and my family that I felt I should pay it back, however modestly, by offering it my time, my knowledge, and my experience. Of course, only time will tell whether I will succeed, but at least I will not blame myself for not trying. I realize, of course, that from now on much of my strength and usefulness will depend upon the assistance of others: the Senate, the staff, the administration, the students, the alumni, the government, and the people of the province. Public office to me is public service, whose partner is public trust, and I hope that the people I will be serving will be kind to me.

My third duty -- a tribute to my very capable predecessor, Jean Forest -- is equally pleasant. To serve in any public office requires a great deal of courage, dedication, and generosity. Jean Forest has all of those fine qualities in great abundance. As a result, this University will not only remember her for being the first lady Chancellor, but also for the grace and wit which she brought to that position. May God bless you, Jean, in whatever you undertake in the future; I personally look forward to working with you in your capacity as Honorary Chairman of the University's 75th Anniversary Committee.

I am no orator, and I do not intend to expand on the abstract advantages of knowledge or the beauties of self-improvement. However, I thought you might wish to have some of my views on the University and on Education. Each of us sees things a little differently, and I would

ask that you take my words in the spirit in which they are offered -- as one person's point of view.

What is a university? To me, the university and knowledge are synonymous. The university is a depository of all the knowledge and experience of the past and all the knowledge and ability of the present. It transmits that knowledge to the students, along with the values without which knowledge alone is useless. The university is also a discoverer of new knowledge. To me, the university as a rich depository, as an effective transmitter, and as a diligent discoverer of new knowledge is an invaluable public resource in the service of the people.

Taken together, the professors, students, administrators, support staff, and facilities constitute the university. They contribute to the thought, the moral energy, the intellectual happiness, and the spiritual hope of society. While finances are important, the true measure of a university is its ability to deal in culture above the mere mathematics of life. The university's true measure is its ability to graduate men and women ready and willing to serve the nation as good useful citizens who also know how to judge the life they enjoy.

According to Milton, education is that which fits a man or a woman for all private and public duties, in peace and in war. I believe in such a well-balanced education. The sciences and the arts should be learned at the same time. They are sisters, two sides of the same coin. I believe also that there is a price to be paid for

one-sided education. A legal dictionary is not a criminal code. Order, meaning, and purpose is necessary in everything. The truly educated not only have knowledge, but they can also recognize "the music of the spheres" and get a comprehensive view of whatever life can offer. Education cannot and will not guarantee happiness or security against the misfortunes of the world. It is not a vaccine against pain, grief, and loss. It can, however, give us the necessary strength to survive such misfortunes without losing faith in life and in one's fellow human beings.

The Senate Report on University Purpose has just been released and I commend it to all who are seriously interested in the future welfare of The University of Alberta. It states that a university has traditionally had four inter-related purposes: The preservation of knowledge, the discovery of knowledge, the communication of knowledge, and service to society. Since I am not sure whether the "communication of knowledge" includes the communication of values, I would add the latter as the fifth purpose. In a world that grows more complicated daily, we need people in the professions, in industry, in labour, and in business with principles or values to ensure rules of action, integrity, justice, fairness, and idealism. However difficult it may be, a university must try to transmit values. While desire and reality may never meet, it is important that we never lose sight of the desire for Whatsoever Things Are True, as dreams often transform reality. We must, of

course, teach the young how to read, but we should also teach them what is worth reading and especially how that "worth" is determined. Under the purposes of the university, it is well to note briefly a dimension that universities have tended to ignore until recently, namely multi-culturalism. As you may know, I am by birth a Ukrainian and proud of it. People are proud of their origins, whatever their race, color, or nationality and however long they have lived in Canada. This is perfectly normal; this is how it should be. There are two aspects that the universities should consider in developing programs of study. The first is that seventy percent of Canada's territory west of Ontario is inhabited by about eight million people and the origins of the majority of them are neither British nor French. They are tax-paying, law-abiding, good Canadian citizens. They claim recognition, but they claim even more the right to be "different," that is, to be themselves. The universities need to take more note of that when developing curricula and providing facilities.

The second significant aspect of multi-culturalism to be noted is the reference to it in the new Canadian constitution. Section 27 states: "This charter shall be

interpreted in a manner consistent with the preservation and enhancement of the multi-cultural heritage of Canadians."

The above section also obliges universities to take care that what is taught is sufficiently broad to encompass more than the two "founding nations." There is strength in diversity, there is beauty in cultural variety, and the ethnic composition of Canada's west calls for the recognition of the unique needs of Canadians of "other origins." Each one of us is different. As such we have to struggle endlessly to maintain our "identity," our ways, our views, our beliefs. We are the products of our culture, our upbringing. We are a blend of the old and new worlds. The majority of many western Canadians are bicultural and bilingual human beings. To these Canadians, unilingualism in education, while not harmful, is at best a one-way street to the proverbial melting pot. Language and culture are inextricably linked. Without bilingualism, the individual's biculturalism is weak, and without a healthy biculturalism, the base disappears for Canada's proud identity as a multi-cultural country.

I think it is time that Canada's universities were enlisted in the task of building and sustaining a multicultural nation. And I submit that the place to begin is to recognize the value of bilingualism in education at all levels in official and non-official languages. In recent years the university has given up the lead in language learning to the governments and the school systems. It is time that the university resumed its former place as the main advocate of second-language learning in the country. I would prefer to see the Senate's initiatives to date as preliminary to further efforts in that direction for the good of the individual and the country. We admire the economic accomplishments of the Japanese and long for mutual advantage. But when the Japanese sell to us they use English, and when we try to sell to the Japanese we too use English. That is hardly the way to win friends and influence

people. We all know that, and The University of Alberta must try harder to change the situation. There is much innate linguistic ability to be tapped in western Canada, and The University of Alberta must do all it can to release the rich cultural potential. On this subject, I would propose that Lord Acton's words be the University's guide. In 1862, he wrote in his article "On Nationality:" "Those states are substantially the most perfect which include various distinct nationalities without oppressing them. Those in which no mixture of races has occurred are imperfect; and those in which its effects have disappeared are decrepit. A state which is incompetent to satisfy different races condemns itself; a state which labours to neutralize, to absorb or to expel them, destroys its own vitality."

To me, teaching has always been a sacred undertaking, because knowledge is useless unless it is communicated to students and directed toward a

more tolerant, cultured, and civilized world. We need professors whose thoughts and actions go together, because only thoughts proved in action become truth, become reality, become life itself. Nothing, including politics, should be "above" professors at the university, because it is their duty to pass on to the students not only what they have learned from books and from nature, but also all they have learned from life itself, from the actions of living people.

I wish first to remind the students of an old Roman saying *non scholae sed vitae discimus*. Education does not come without toil, without exertion, and it is not easy to learn the laws that govern life, and even harder to grasp God's laws. Yet learn them we must. Each and every student entering a university should ask: What will I do with the education I receive? Will I use it simply to "deal in perishables" or will I emerge useful to my fellow man? The diploma is not enough. People today look behind

Best Wishes Warmly Extended to Retiring Chancellor

"The party's over..." and so, too, the Chancellorship of Jean Forest. But if the atmosphere at the recent Garden Party, held in her honor at University House, is any indication, she will not soon be forgotten. The eleventh Chancellor of The University of Alberta, Mrs. Forest was the first woman, and, as she pointed out, the first non-university graduate to hold the office. Her term was marked by her grace, her candor, and her commitment.

Numerous well wishers attended the Garden Party and ecomiums were plentiful. For example, Mrs. Forest was praised by Louis Desrochers, former Chancellor, who proudly claimed the distinction of being the person reasonable for first bringing Mrs. Forest to the University and who announced the establishment of the Jean B. Forest Prize in her honor. And

she was praised by President Horowitz who said that the University will long remember Mrs. Forest and her commitment and service to the University community. "When they write the next history of The University of Alberta, there is little doubt in my mind that the years (from 1972 to 1982) will be referred to as the Jean Forest Years," he said in a public yet very personal tribute to the retiring Chancellor.

W.A. Blanchard, who conferred the distinction of Chancellor Emeritus on Mrs. Forest, said she had "served with exemplary dedication and distinction as Chancellor of this University."

The party may be over, but the memories of Mrs. Forest and her remarkable contributions to The University of Alberta will most certainly remain. □

diplomas and search not only for skills, but also for values and the willingness to contribute, to be of service. Try to base your "great expectations" on what you yourself will do, produce or contribute, and not on what others or the government will provide for you. Remember that it is you, the students, who will have to take over and show the way, as you live, others will try to live also.

Honourable members of the legislative assembly: We are honored by your presence today. It gives us hope that the close and honorable alliance that has existed between the government and this University for seventy-five years will continue. I do not need to tell you that the future of this province is being forged mostly in the institutions of learning. The resources available to universities must be sufficient to permit scholars, researchers, philosophers, and scientists to concentrate on their jobs. There is no better or safer investment, nor one which yields better, than an investment in learning. Can anyone pay too much for education? Nothing is so costly as ignorance, and nothing, by comparison, is as cheap as knowledge. Of course, one must guard against waste and insist that every dollar is accounted for. What some call the "warehousing of students" must also be resisted. People who are incapable or unwilling to learn have no place at a university. But for those who can profit from it we should strive to provide the best education possible for every dollar we can afford to spend.

Since I begin my term of office on the eve of our University's 75th Anniversary, let me say how much I look forward to the planned celebrations. None will be able to visit this University during the next year without noting that seventy-five years ago an acorn was planted for the young oak we behold today. A constant stream of well-educated men and women have left this University with knowledge and integrity and skills and principles to promote literature, the sciences, the arts, the economy, statesmanship, and religion.

So, let us praise and honor the men and women who laid the foundations. And let us do so with deeds as well as words. Let us hope for tangible acts by the governments, by the people of Alberta, and especially by our alumni. It is our duty to build up

our alma mater, to endow, to enlarge, and to secure its future. As a sage once said, the advancement of learning is the highest commandment. I agree wholeheartedly and hope that you concur. If you do, it would be entirely fitting to open our hearts

and purses to our University. Education is light, and what are our lives if not sparks of the eternal light, so let us spread the light of education even more widely for the good of our province, our country, and the world. □

Bon Mots Tossed Off at 75th Anniversary Banquet

It's the evening of 6 July and in the banquet room of Edmonton's Westin Hotel University of Alberta people are breaking bread and about sixteen hectares of new public relations and goodwill ground. The occasion is the 75th Anniversary Banquet and 400 people from the University, other Alberta universities and colleges, municipal and provincial governments, and society in general are ushering in the anniversary year and all that it stands for.

Sherburne McCurdy, President of Alberta College, an institution, he hastens to point out, that observed its 75th birthday in 1978, is predicting that, as with the College, the milestone anniversary will breathe new life into the University. It's good to look back at your roots and consider where you came from and where you are going, he says preparatory to announcing the College's gift to the University of an oaken stand and a supply of quill pens to facilitate the signing of their names by future honorary degree recipients.

Next, John Elson, Chairman of the Athabasca University Governing Council, lets the festive diners in on the fact that Athabasca President Stephen Griew speaks five languages including Cockney, English, Australian, and Swedish. "What makes it interesting is that he speaks them at the same time."

J. Louis Lebel, Chancellor of the University of Calgary, presents an anniversary medallion donated by Sherritt Gordon Mines Ltd. to President Horowitz and calls on David Watts, a recently graduated University of Alberta Education student, to

Two gentlemen from Finery Row, Mayor Purves (left) and Chancellor Savaryn, help inaugurate the University's 75th Anniversary Year.

accept his prize as the winner of the essay contest on the topic "Canadian Crisis 1981." The contest was sponsored by the University of Calgary Senate for our University's 75th Anniversary. The prize consists of assistantship, fees, accommodation, and books on the order of \$10,000 — one full year of graduate study at the University of Calgary.

Islay Arnold, Mr. Lebel's counterpart at the University of Lethbridge, reveals that, on 19 March 1983, the university will host a 75th Anniversary party that will feature a performance by the renowned Royal Winnipeg Ballet. The idea behind the event is that University of Alberta alumni in the south can meet with President Horowitz, Chancellor Savaryn, Board Chairman Schlosser and others at their convenience.

As he introduces Mayor Purves, Mr. Savaryn says that "I won't ask His Worship to speak about the Convention Centre because this is a happy night." The mayor opines that the University has become a focal point for Edmonton and expresses appreciation for the University's "outward look" toward the community. He also extends congratulations on "the magnificent work that has been done" and presents a memento to the Chancellor rather than to the University as a whole because "our budget is as bad as yours."

Advanced Education and Manpower Minister Horsman advises the University to look to the future and to take full advantage of the 1980s Advanced Education Endowment Fund. He also says that the last thing he wants to see is an institution that is solely dependent on

government grants and invites the private sector to contribute more to the welfare of post-secondary institutions

"To the administrators with all your tricks ... I mean subtle ways of achieving your ends, The University of Alberta will rise to the challenge of the future as it has in the past."

The evening has long since given way to night and President Horowitz is thanking everyone for their gifts and referring to the University flag that was unveiled

earlier. "The first President is remembered for creating something out of very little. The fourth President brought the University through the war years, the sixth President took the University through a period of unbelievable growth ... I seem destined to be remembered as the President who brought a flag to the University."

This night seems destined to be remembered for the unflagging sense of humor displayed by the speakers. □

Pass the Bacon, Please

The NASA Klondike Breakfast will be held this year in the Central Academic Building Cafeteria from 7:30 to 10 a.m. on 23 July. Entertainment will be provided by Kathy Mitchell and band, the Klondike Review, Ernie Towne, Klondike Kate, Klondike Mike, and the Klondike Dollar Girl.

Kathy Mitchell will appear

between 8 and 9 a.m. and the Review, Klondike Kate, Klondike Mike, and the Dollar Girl will entertain from 9 to 10 a.m. All members of the University community are urged to attend and wear their costumes. There will be two \$25 prizes for the best costumes (male and female). Breakfast this year will cost \$1.90. □

Amendments to University Traffic and Parking Regulations

Several amendments to The University of Alberta Traffic and Parking Regulations have been approved by the Board of Governors to take effect 1 July 1982.

Perhaps the most noteworthy of these amendments concern small car parking, bicycle parking, and the removal of expired permits. The following are now prohibited: Parking or storing a bicycle inside a University building or in such a way as to create a pedestrian, safety, or maintenance problem, Section 5.4(c) (XV); Parking a vehicle with a wheelbase larger than 280 centimetres in areas signed "Small Cars Only,"

Section 5.4(c) (XVI); Displaying an expired parking permit in conjunction with a valid parking permit. Expired permits must be removed from vehicles, Section 5.4(c) (XVII).

In addition, the amounts of fines levied for various offences have been increased. Also increased are the daily rates for visitor parking which are as follows: Weekdays (arrive before 10:30 a.m.) \$2.00, (arrive after 10:30 a.m.) \$1.50. Weekends/Holidays (attended areas) \$1.00.

Copies of The University of Alberta Traffic and Parking Regulations are available on request from Parking Services, Art Workshop I. □

Drama Teacher Dorothy Heathcote to Conduct Tutorials

University drama students, educators, arts consultants, and researchers will have the opportunity to attend special tutorials with Dorothy Heathcote, one of England's most respected drama teachers, at The University of Alberta, 19 to 23 July.

Co-sponsored by Alberta Culture and the University, the tutorial program features the internationally known drama teacher and lecturer from the University of Newcastle Upon Tyne. Her teaching methods have been the subject of books and films aimed at creating an exciting, challenging school

learning environment.

The one-hour tutorials offer individual attention with Mrs. Heathcote. Topics of discussion might include her philosophy on education, specifics of her teaching method, and how to implement it at the class level.

All tutorials will take place in 451 Education South. The sessions are free. Pre-registration is required. Contact: Alberta Culture, Performing Arts, Education, 11th floor, CN Tower, 10004 104 Avenue, Edmonton, Alberta. Telephone 427-2563. □

Mechanical Engineers Honored

Two members of this University's Department of Mechanical Engineering were honored recently by the Association of Professional Engineers, Geologists and Geophysicists of Alberta (APEGGA). Donald G. Bellow, Professor and Chairman of Mechanical Engineering, and George Ford, Professor of Mechanical Engineering and former Dean of the Faculty of Engineering, were named recipients of the L.C. Charlesworth Award at the Annual Meeting of APEGGA held in Calgary in June.

The award is made annually to members of APEGGA who have "served their profession diligently for many years and have made substantial contributions to the operation of the Association and the advancement of its professional status."

Dr. Bellow, a graduate of the University of British Columbia (BASC 1956) and The University of Alberta (MSc 1960; PhD 1963), is currently in his third term as Chairman of Mechanical Engineering. He has participated in numerous technical

associations and has served as member and Chairman of the National Research Council Mechanical Engineering Grant Selection Committee in Ottawa. He has been an active member of APEGGA since joining the Association in 1963.

Dr. Ford, also a graduate of The University of Alberta (BSc 1942; MSc 1943) and Stanford University (PhD 1948), began his long association with this University in 1942. His contributions to engineering education include the establishment of the Department of Mechanical Engineering at The University of Alberta in 1959, serving as the Department's first Chairman from 1959 to 1970, and serving as Dean of the Faculty of Engineering from 1970 to 1975.

Dr. Ford is a life member of APEGGA (1964), and is a recipient of the Centennial Award (1975) and the CCPE Gold Medal (1978).

The third recipient of the 1982 Charlesworth Award was J.L.A. Carey, Vice-President and Director of Montreal Engineering Co. Ltd. □

Karl A. Lesins, 1906-1982

Karl Lesins, Professor Emeritus of Genetics, passed away on 2 July 1982. Born in Galgauski, Latvia, Dr. Lesins received his first scientific degree in agronomy at the University of Riga in 1928. This was followed by postgraduate studies at the Agricultural Research Institution at Kiel, Germany. Returning to Latvia, he held positions as District Agronomist (Bukaisi, 1930), Headmaster of the Bebrene School of Agriculture (1931 to 1941), and Superintendent of the State Agricultural Research Station at Osupe (1941 to 1944).

In 1945, Dr. Lesins and his wife, Irma, went as refugees to Sweden where he worked as an Agronomist with the Uppsala Swedish Seed Association (Ultuna and Svalof) from 1945 to 1951. He enrolled at the Royal Agricultural College of Sweden and received the degree "Licentiate of Agronomy" in 1950.

In 1951, Dr. Lesins and Mrs. Lesins came to Edmonton on scholarships from the National Research Council and The University of Alberta. He held the position of Research Associate in Forage Crops from 1954 to 1961. He received the

DSc degree from The University of Alberta in 1957 and was made Associate Professor in 1962, and Professor of Genetics in 1965. He retired in 1971 and was awarded Professor Emeritus status the same year.

Karl Lesins was internationally well known for his work on alfalfa and its relatives. He has published more than thirty research papers, mostly on the different species of *Medicago*, and has written a definitive book entitled *The Genus Medicago* (1979). Dr. Lesins received the Alberta Achievement Award for

excellence in 1979.

He was the foremost authority in the taxonomy, cytogenetics, and evolution of *Medicago*. He established the most complete collection in the world, one which comprises sixty species and 3,000 accessions, the result of eight expeditions to the Mediterranean countries and by interchange with foreign institutions. Because all of the perennials interbreed, his *Medicago* collection is a precious world heritage for the improvement of alfalfa as a forage crop.

Dr. Lesins was a long-time

member of the American Society of Agronomy, the Agricultural Institute of Genetics, the Canadian and American Genetics Societies, and the American Association for the Advancement of Science, and was Chairman of the Committee on Plant Gene Resources for the Genetics Society of Canada from 1974 to 1979.

He will be remembered by his friends in Genetics and for the compassion and support he gave to new Canadian immigrants and the Latvian community in Edmonton. □

U.S Facing Challenge of Metrication

Canada is going metric. But the challenge of voluntary metrication is one still being wrestled with in the United States.

W.H. Jopling, Director of Technical Services, recently sent *Folio* the May 1982 edition of *Metric Monitor*, published by the Metric Commission of Canada. It includes an article on the United States position regarding the question of metrication. "Because there is so much confusion as to just what the U.S. position is, I thought it might be worthwhile saying something about this..." explained Mr. Jopling. *Folio* concurs. Reprinted herewith are excerpts from an article by David Gorin, President of the American National Metric Council (ANMC).

"It appears almost certain that the U.S. Metric Board (USMB) will cease operation at the end of September 1982. There is speculation on the effect this development will have on the U.S. move to metric, and it is important to view the closing of the Board in its proper perspective. "The Reagan Administration's termination of the Board no more de-emphasizes the merits of metric than its attempts to close

the Departments of Education or Energy de-emphasizes the importance of those areas. The President has strong convictions about the size of government and the capabilities of the private sector to face up to its responsibilities. With those convictions, the President is returning the decision-making process back to the hands of those whom he thinks can most effectively address the issue — the private sector. The administration's commitment to metric is evidenced by its shifting the responsibility for the government's metric functions to the Department of Commerce... "The domestic and international trend toward metric measurement existed before USMB, and will

most certainly continue after it closes. The private sector organized ANMC to meet the metric challenge long before USMB came into being...

"The private sector should take the administration's move as a vote of confidence in its ability to confront the metric issue."

In a letter to the Honorable Louis Polk, Chairman of the USMB, President Reagan gave the assurance of his "support for the policy of voluntary metrication expressed in the Metric Conversion Act of 1975."

The Act to which the President refers established a voluntary environment and charged the private sector with setting the pace and direction of conversion. □

'Big E' Getting Bigger

The 1982 census reveals Edmonton's population is 551,314, an increase of 30,109 or 5.77 percent over 1981, Mayor C.J. Purves announced recently.

The city's population has been increasing by greater percentages each year: in 1979 the increase was 2.78 percent over the previous year; 1980, 2.93 percent;

1981, 3.05 percent; and this year, 5.77 percent.

The relative jump in this year's figures is due in part to 9,547 people living in areas annexed to Edmonton earlier this year. The city's population would have increased 3.95 percent had annexation not occurred. □

Letters

• In response to the "Letters to the Editor" of Kettle Shoemaker Ross (8 July 1982) complaining of the alleged discrimination in the locker room facilities of the Physical Education Department against women users of the facilities, I would support abolishment of distinctions made by the Physical Education authorities between male and female users of that department's facilities.

As the doctrine of "separate but equal" facilities is no longer acceptable in North American society (and is in fact, subject to correction, an outlawed doctrine), I would advocate the abolition of "apartheid" practised by the Physical Education Department in segregating males from females, and provide a single locker room facility to be enjoyed by all users.

I may be so bold as to predict that the adoption of such a policy will result in an overwhelming use of the locker room facilities and will certainly preclude any further letters of "unfair discrimination" being written.

G.H. Sperber

Faculty of Dentistry

people

Dale Bent (Director, Computing Services) has returned from a trip to several European countries. The trip, organized by People-to-People International, had the purpose of assessing academic computing at several outstanding computing centres, studying national policies with respect to academic computing, and learning of new technical developments in European computing.

K.E. Bollinger (Electrical Engineering) was an Invited Course Lecturer at the Gippsland Institute of Advanced Education in Churchill, Australia, from 10

to 12 May. Dr. Bollinger, who holds the University's Electric Utilities Chair, a post funded by the Electric Utility Companies in the Province of Alberta, cooperated with the Institute in presenting a course in Process Control. The course was designed for engineers and technologists interested in the practical problems associated with maintaining, designing, and tuning feedback control systems. Participants in the three-day course had the opportunity to work with Dr. Bollinger on a variety of practical problems, discuss feedback control concepts in everyday language, and gain hands-on experience with modern experimental test equipment.

R.T. Coutts (Pharmacy and Pharmaceutical Sciences) was selected as the first recipient of the McNeil Research Award. This award is given by McNeil Laboratories (Canada) Ltd. in recognition of excellence in pharmaceutical research by a member of the Association of Faculties of Pharmacy of Canada, and consists of a

certificate, a cheque for \$1,000, and an expense paid trip to receive the award. Dr. Coutts accepted the award in Ottawa last month.

Dr. Coutts has also been named an Honorary Member of the Alberta Pharmaceutical Association in recognition of his contributions to pharmacy teaching and research in Alberta.

Sharon Brintnell (Occupational Therapy) presented two papers at the 8th International Congress World Federation of Occupational Therapists held in Hamburg, Germany, 13 to 18 June: "Mental Status Examination — A Fundamental Assessment Tool in O.T. Practice" and "Life Situation Profiles of Traumatic Quadriplegic Rehabilitants."

Patricia Wood (Occupational Therapy) attended the same Congress and presented three papers: "Survival Skills for School Therapists," "Getting the Profoundly Retarded to Interact," and "Occupational Therapy Needs in Further

Academic Schedule, 1982-83

The following information is published with a view to having staff plan for holidays with greater assurance than in past years. Library, Computing Services, and Food Services hours will also be announced at appropriate times.

*Labour Day, holiday	6 September, Monday
Registration week	7 September, Tuesday
Classes start	13 September, Monday
*Thanksgiving Day, holiday	11 October, Monday
*Remembrance Day, holiday	11 November, Thursday
Examinations week	16 to 21 December
Classes start, second term	4 January 1983, Tuesday
Reading Week	15 to 21 February
*Good Friday, holiday	1 April
*Easter Monday, holiday	4 April
Final Examinations	16 to 25 April

Please note that Tuesday, 12 April, is to be treated as a "Monday" (to make up for the 4 April holiday) and will be the final day of classes for Faculties other than Dentistry and Medicine.

University Buildings Closed

In addition to the dates asterisked above:

Heritage Day	2 August, Monday

Education" which was submitted jointly with *Helen Madill*, also of the Occupational Therapy Department.

The Canadian College of Teachers (CCT) has announced that *Judy Lupart*, a graduate of the Department of Educational Psychology, has been named the recipient of the Wilfred R. Wees Doctoral Thesis Award for 1982. The award, given out only once every three years, goes to the defendant of the thesis judged best in Canada in the field of special education. Dr. Lupart's thesis, entitled "Attention and the Disabled Reader: a Top-down Perspective," was chosen as winner of the award for theses presented and successfully defended during the calendar years 1979, 1980, and 1981.

According to *R.F. Mulcahy*, Associate Professor of Educational Psychology and supervisor of Dr. Lupart's thesis, she is "most deserving of the honor. She is an astute scholar, and hers is an excellent piece of work." Dr. Lupart accepted her award at the 25th Annual Meeting of the CCT, held 8 July in Niagara Falls.

Louis A. Pagliaro (Pharmacy) has recently been selected by Correctional Services Canada to research, develop, and implement a "drug and substance abuse" program at Edmonton Institution — the federal maximum security facility for the prairie provinces.

At the June 1982 conference of the International Association of Campus Law Enforcement Administrators sponsored by State University, Buffalo, New York, *W.F.G. Perry* (Director, Campus Security and Parking Services) was elected to the Board of Directors as the Canadian representative. Thirty-eight Canadian universities are members of the association.

The President has appointed *Fran Trehearne* as the Student Discipline Officer. Mr. Trehearne will administer the Student Disciplinary Procedures approved by General Faculties Council and the Board of Governors and will

hold an *ex officio* position on the GFC Campus Law Review Committee. Student Disciplinary Procedures provide for the striking of discipline panels and appeal boards to hear cases involving alleged violations of the Code of Student Behaviour. Discipline cases involve both academic matters, such as cheating, and non-academic offences, such as damaging University property.

Mr. Trehearne holds a BEd degree from The University of Alberta and served as Student Adviser from 1977 to 1981. He is currently employed by the Faculty of Engineering Placement Office.

Yar Slavutych (Slavic and East European Studies) was honored by the title of Ukrainian Poet Laureate last June during the annual meeting of the Ukrainian Mohylo-Mazepian Academy held at the National Library in Ottawa. He was cited for his *Collected Poems, 1938-78* published recently in Edmonton. Afterwards, he delivered his paper "The Indian Legend about Hetman Ivan Mazepa Recorded in Canada." At the Canadian Association of Slavists' conference, he chaired the Ukrainian Shakespeare Society's session. On his way back, Professor Slavutych participated in the conference on Ukrainian Literature in the Twenties held at the University of Illinois, Urbana, where he read another paper on "The Unity of Souls in the Poetry of Vasyl' Stus."

service information

All information to be included in this column must reach the Office of Community Relations by 9 a.m. the Thursday prior to publication.

Coming Events Music

18 July, 8:30 p.m. An evening of music with a variety of artists performing. Convocation Hall.

20 July, 7 p.m. Promenade on the lawn of

Athabasca Hall with "The Old Strathcona Town Band."

Lectures and Seminars

Legal Seminar

22 July, 7 p.m. Student Legal Services will present the seminar "Small Claims." 231 Law Centre.

Non-Credit Courses

Devonian Botanic Garden

Mushroom Hunting for Beginners

Date: 24 or 31 July. Fee: \$20. Indulge yourself in a day's trek to identify and gather local mushrooms. Sample dishes prepared using the edible varieties.

Faculty of Extension

English as a Second Language

Date: Until 25 August. Fee: \$65. For further information, contact Ruth Pearce or Cecile Ochman at 432-2497 or 432-3036.

Computing Services

Client Training Sessions

Computing Services is taking registrations between 8:30 a.m. and noon for the following non-credit courses. For further information, please telephone Information Services at 432-2463, or come to 352 General Services Building.

Introduction to Spires

Course number: 736. Date: 19 July. Time: 1-4 p.m. Fee: \$5. Prerequisites: "MTS and Editor Fundamentals" and a good working knowledge of file editing and terminal use. Place: 328/351 GSB.

Data Preparation for Statistical Packages

Course number: 741. Date: 26 July. Time: 1-4 p.m. Fee: \$5. Prerequisites: "MTS and Editor Fundamentals." Place: 328 GSB.

Introduction to BMDP Control Language

Course number: 743. Date: 27 July. Time: 2 to 4 p.m. Fee: \$5. Prerequisites: The "Data Preparation for Statistical Packages" seminar is recommended. "Introduction to Computing" or a knowledge of MTS is required. Place: 328/351 GSB.

Introduction to SPSS Control Language

Course number: 745. Date: 29 July. Time: 1-4 p.m. Fee: \$5. Prerequisites: The "Data Preparation for Statistical Packages" seminar is recommended. "Introduction to Computing" or a knowledge of MTS is required. Place: 328/351 GSB.

Introduction to Computing

Course number: 666. Date: 26 July. Time: 11 a.m. to 1 p.m. Fee: \$5. Prerequisites: No previous computing experience, but familiarity with a keyboard is required. Place: 351 GSB.

MTS and Editor Fundamentals

Course number: 684. Date: 28 and 30 July. Time: 11 a.m. to 1 p.m. Fee: \$10. Prerequisites: "Introduction to Computing" or equivalent working knowledge of a DECwriter terminal and MTS. Place: 351 GSB.

MTS Overview

Course number: 710. Date: 27 and 29 July. Time: 10 a.m. to 12 noon Fee: \$10. Prerequisites: "MTS and Editor Fundamentals." Place: 328/357 GSB or 328/327 GSB.

Scholarships, Fellowships and Awards

Monsanto Canada Scholarship in Weed Science

Donor: Monsanto Canada Ltd. Where Tenable: At a university in western Canada. A similar award is made in eastern Canada. Level: Graduate. Field: Plant Science, Soil Science, or Agricultural Engineering. Value: \$1,500. (This scholarship also includes travel expense, hotel and other reasonable expenses for the recipient's attendance at Western Section Meetings of the Expert Committee on Weeds.) Number: One. Duration: Not specified. Conditions: Any student entering graduate studies in Plant Science, Soil Science, or Agricultural Engineering with a thesis project on weed control, herbicide chemistry or application technology, weed biology, or weed ecology. Selection based on academic grade point average in the last two years of undergraduate study and demonstrated aptitude and/or experience in conducting research at a graduate student level in weed control. Closing date: 1 September 1982. Further information: Further information and application forms should be requested from: Transcript of marks, curriculum vitae, and a letter of application including letters of reference should be completed and sent to: Mr. D.R. Valgarson, Monsanto Scholarship Committee, Expert Committee on Weeds, 830 King Edward St., No. 17, Winnipeg, Manitoba, R3H 0P5.

Notices

Shastri Indo-Canadian Institute

As part of the Canadian Studies Exchange Programme the Institute proposes to send two scholars to India during the 1982-83 academic year — one specializing in Canadian economics, and the other in Canadian politics. It is looking for dynamic scholars who can lecture effectively to students, faculty, and general audiences. The visits to India will be of approximately one month's duration each, and the itineraries will include limited tours to major Indian institutions. International travel, and living and travel costs in India will be covered by the Institute and the Indian University Grants Commission.

Scholars interested in being considered for participation in the Canadian Studies Exchange Programme should reply by letter, enclosing an updated curriculum vitae, to the Institute's Head Office not later than 10

page seven, Folio, 15 July 1982

September 1982. The address is: Shastri Indo-Canadian Institute, The University of Calgary, 2500 University Drive N.W., Calgary, Alberta, T2N 1N4.

At its recent meeting the Board of Directors of the Shastri Indo-Canadian Institute elected Professor N.K. Choudhry, Department of Political Economy, University of Toronto, to the office of President. Professor Ratna Ghosh, Director, Graduate Studies in Education and Research, Faculty of Education, McGill University, succeeds Professor Jayant Lele as Resident Director, and she will assume the duties of that office on 15 July.

Jean Jaunt

The Provincial Museum of Alberta is planning a travelling exhibition on the history of blue jean making in Alberta and the GWG Company.

If you have blue jeans, jackets, World War II military uniforms or other clothing manufactured by the GWG Company prior to 1972 Museum personnel would like to talk to you.

Please contact Sandra Morton, Curator of Social History at the Provincial Museum of Alberta, telephone 427-1743, if you are willing to donate, loan, or sell any article.

Surplus Equipment

The equipment appearing in this column is available only to University Departments with University Administered Funds. For further information about the purchase of equipment or the disposal of any of your department's surplus equipment, contact Bonnie O'Dwyer or Roy Bennett, telephone 432-3208.

- 1 - Exide Uninterruptable Power supply consisting of the following components:
- Exide Static Invertor, Model 120/3, 7F, 105-140V, 3.7 KVA, 30 amps.
- Exide Auto Transfer Switch, Model MO 707, Input 120 VAC 64 amps. Output 125 VAC 35 amps.
- 20 only 6 VDC Exide Batteries, Lead Acid 144AH.

For further information, please call Ed Evason at 432-2986. (Note: The preceding equipment was noted in Folio, 1 July 1982. The contact person is Mr. Evason not I. Zainul.)

Positions Vacant

The University is an equal opportunity employer but, in accordance with Canadian Immigration requirements, these advertisements are directed to Canadian citizens and permanent residents.

Librarian

The University of Alberta Library requires a librarian to serve as Assistant Special Collections Librarian and General Reference Librarian, Undergraduate Library, time to be divided equally between the two divisions.

Special Collections duties include: supervision and execution of Special Collections cataloguing projects including manuscript and non-book collections, reference duties with emphasis on western Canadiana and English literature, training and supervision of support staff.

page eight, Folio, 15 July 1982

Undergraduate duties include general reference service, primarily in Arts and General Sciences; library instruction; book selection; and supervision of support staff.

Professional library qualification required. Salary according to experience and qualifications. Excellent fringe benefits, removal grant. Applicants should send curriculum vitae, transcripts of academic record, and the names of three references to Bruce Peel, Chief Librarian, University of Alberta, Edmonton, Alberta, T6G 2J8. Deadline for receipt of applications is 23 July 1982.

Non-Academic Positions

To obtain further information on the following positions, please contact Personnel Services and Staff Relations, 2-40 Assiniboia Hall, telephone 432-5201. Please do not contact the department directly. As positions are filled on an ongoing basis, these vacancies cannot be guaranteed beyond 9 July 1982.

- Clerk Steno II (\$1,106-\$1,324) — Forest Science
- Clerk Typist II (\$1,106-\$1,324) — Romance Languages
- Clerk Typist III (Trust) (\$1,232-\$1,487) — Civil Engineering
- Clerk Steno III (\$1,232-\$1,487) — Institute of Law Research and Reform
- Systems Control Clerk (\$1,274-\$1,548) — Administrative Services
- Dental Assistant II (Trust) (\$1,324-\$1,616) — Mobile Dental Clinic, Dentistry
- Secretary (\$1,373-\$1,682) — Introductory, Biology Program, Nursing
- Administrative Clerk (\$1,373-\$1,682) — Engineering Placement Office
- Library Assistant II (\$1,373-\$1,682) — Rural Economy
- Computer Assistant (\$1,106 - \$1,324) — Computing Services
- Food Service Worker III (\$1,324-\$1,616) — Housing and Food Services
- Food Service Worker IV (\$1,426-\$1,754) — Housing and Food Services
- Technician I (Trust) (\$1,426-\$1,754) — Pharmacology
- Biology Technician II (\$1,616-\$1,992) — Genetics
- Biochemistry Technologist I/II (Trust) (\$1,616-\$2,265) — Biochemistry
- Laboratory Technologist I (\$1,754-\$2,171) — Provincial Laboratory
- Technologist II (\$1,829-\$2,265) — Physical Education and Recreation
- Biochemistry Technologist II (Trust) (\$1,829-\$2,265) — Pediatrics
- Nurse (\$1,829-\$2,265) — University Health Service
- Biology Technologist II (\$1,829-\$2,265) — Forest Science
- Programmer/Analyst II (\$2,078-\$2,581) — Office of Administrative Systems (Customer Support), Computing Science
- Programmer/Analyst II/III (\$2,078-\$3,085) — Institutional Research and Planning
- Nurse Practitioner (\$2,368-\$2,951) — Pediatrics
- Programmer/Analyst III (Trust) (\$2,472-\$3,085) — Computing Science

- Programmer/Analyst III/IV (\$2,472-\$3,697) — Computing Science
- Instrument Mechanic (\$2,518.53) — Physical Plant
- Contracts Supervisor (\$2,581-\$3,229) — Physical Plant (Projects)

The following is a list of currently available positions in The University of Alberta Libraries. The bulletin board in Cameron Library, Room 512, should be consulted for further information as to availability and position requirements.

- Library Assistant II (\$1,373-\$1,682) — Cataloguing, Law Library

Advertisements

Advertisements must reach the Editor by 3 p.m. on the Thursday prior to publication date which date also serves as the deadline for cancellation of advertisements.
